

ELI43-CR

Product Change Notification Form

PCN Number: 20210525-01	Rev: 3.7	Date: 05/25/2021
-------------------------	----------	------------------

Summary of Change: FDI has updated the ELI43-CR to remove unused components.

Reason for Change:

To simplify the manufacturing process for the ELI43-CR, we are removing unused components from the PCBA. These components have no affect on the ELI43-CR functionality, since they were residual from the ELI43-CP.

Detailed Description of Change:

- 1) Components in the PCAP touch circuit that are unused in the resistive touch ELI43-CR have been removed.

These changes are 100% backward compatible.

For easy identification of EDID revisions on ELI units, FDI has added the EDID revision number to the block 2 display descriptor. This allows the customer to read and verify their EDID revision number at any time (please note that the EDID revision number is not the same as the top level ELI product revision Number).

Products Affected:

Affected Product	Recommended Replacement Product
ELI43-CR (Rev 3.6)	ELI43-CR (Rev 3.7)

Availability of new revision stock at distributors:

Distributors will continue to sell through their existing available stock before filling customers' orders with stock of the new revision of the product.

All future shipments from Future Designs, Inc. will contain this improvement.

Forecasted Key Dates and Milestones:

05/25/21 PCN Date. The date this document was released for distribution to customers and distributors.

05/25/21 Production Date for Recommended Replacement Product. The first date that production quantities of the replacement units will be available for customer order.
